

Halogen Machine Lighting Systems

Quartz Halogen Lamp

JW-55NT Series

The equipment is fitted with coil transformer for high power transmission and resisting unstable voltage. The reflection lense built on luminaire head affords high lighting efficiency, which concentrates light on the working object.

The JW-55NT lamp works on 50 watt, 220 volt AC power. The luminaire head can rotate through an angle of 310°. It is available in two options namely JW-55NTM (Medium arm): JW-55NTL (Long arm). Excellent ergonomy and ease of operation are built-in the system. The Quartz Halogen Lamp gives soft illumination without irritating to the eyes. The lamp is provided with 1.8 metre cord and plug. Lamp head dia is 125 mm

ARM LENGTH : 55NTM → 450 mm
55NTL → 830 mm

JW-55

JH-20RT

High Vibration Resistant Quartz Halogen Lamp

JH-20RT Series

The equipment can be operated on 220 volt operation without the danger of electric shock. The Quartz Halogen lamps are particularly suited to machine and inspection applications in demanding environments. The articulate arm of the lamp provides vibration resistant performance.

The JH-20RT lamp works on 20 watt or 50 watt, 220 volt AC power. The luminaire head can rotate though an angle of 250 deg. It is available in two options namely JH-20RTM (Medium arm), JH-20RTL (Long arm).

Lamp Head Dia : 72 mm
ARM LENGTH : 20RTM → 440 mm
20RTL → 800 mm

Gooseneck Arm Quartz Halogen Lamp

JH-20FT Series

The Gooseneck lamp type : JH-20FT contains an engineering plastic shade and the base provides complete insulation for maximum safety of the operator. The articulate arm provides vibration resistant performance. It operates on 20 watt or 50 watt, 220 volt AC. The transformer is built in the base. The lamp is available with length of the gooseneck equal to 700mm. The Quartz Halogen Lamp provides very good light output which is soft illuminating without irritating to the eyes. The equipment is ideally suited to machine tools and machinery without big work area. Lamp Head Dia is 74 mm.

JH-20FT

Optical Fibre Lamp

JH-20RTL

This fibre lamp is suitable for use in medical treatment, laboratory, precision instrument inspections and work benches. The unit constitutes a flexible fibre optic cable which can be taken flexibly to any part to illuminate the sample under inspection. It provides direct intense light without heat. A 20 watt bulb is provided which operates on 220 volt AC. The Fibre Lamp is furnished with 1.8 metre cord and is having double shades designed for fast heat dissipation.

Available Options : Single fibre optic cable
Dual fibre optic cable

JH-20RTL

IMPORTANT INFORMATION : Halogen Machine Lights are also offered in 12V/24V operation, if quantity is good.
