

Introduction:

Insulation Tester/Megger commonly known as the shake table is an instrument commonly used in electrical devices. Megger is mainly used to check electrical equipment, household appliances or electrical lines and the white-to-ground insulation resistance to ensure that these equipment, electrical and wiring work are in the normal state, to avoid electric shock accidents such as injuries and equipment damage.

General Features & Specification:

Rating Voltage:	50V/100V/250V/500V/1000V
Accuracy:	$\pm 5\% \text{rdg} \pm 5\% \text{dgt}$
DC/AC Voltage Test:	30-600V
Resolution:	1.0V
Overload Protect:	AC 1200V/10S
Withstand Voltage:	AC 8320V/5S
Insulated Impedance:	1000M Ω /DC1000V
Max. Short Circuit Current:	1.3mA
